

# Asset Management

Mock exam questions  
February 23rd, 2015

## Mock questions (1/3)

1. Name 4 main boundary conditions for good Project Portfolio Management and explain.
2. Name at least 4 attributes an opportunity realisation process must have.
3. Typify (define main descriptive elements) of *phase x* of the Kumar model. Describe what was missing in the COT case.
4. Explain the specific characteristics of the Asset Life Cycle Management (ALM) approach according to Schuman & Brent.

## Mock questions (2/3)

5. Typify and distinguish between appraisal techniques for AMT according to Chan.
6. Discuss the life cycle cost trade-off for asset owners as described by Woodward (1997).
7. The investment decision for COT appeared not to be successful. What observations (facts) underpin the fact that the result of the investment decision was not successful? Mention at least two.
8. Which drivers for the incorporation of sustainable development are organisations subjected to, i.e. which 3 “licences” can you distinguish? Briefly explain each.

## Mock questions (3/3)

9. Describe the concept of OEE as explained in the lecture.
10. Describe how, according to Waeyenbergh & Pintelon, most critical components could be identified.
